PROFILE

Aspiring software developer with hands-on experience in building impactful, user-focused applications that streamline institutional operations. Passionate about combining full-stack development with emerging technologies like AI and cloud platforms to create scalable, real-world solutions. Seeking opportunities to contribute to innovative teams and continue growing in a dynamic tech environment.

EXPERIENCE

- Datamyth | Data Analysis Intern** Jul 2025 – Mar 2026
 - Built Flask + MongoDB integrations across the Google, Meta, and LinkedIn Ads APIs, unifying daily campaign metrics (impressions, clicks, ROAS, CPC) into one analytics backend.
 - Built an ML ad-fatigue detector (XGBoost, scikit-learn) that flags creatives before CTR decays, with an LLM generating insight summaries.
 - Added spend-anomaly detection with automated alerts on abnormal daily ad spend.
- Software Development Cell (SDC) | Developer** May 2024 – Present
 - Built and shipped internal PHP/MySQL web apps (Rep Allocation, College Transport, Voucher Management) that replaced paper-based processes for students and faculty across PSG.

PROJECTS

- SEAM – Secure Encryption & Authentication Model | React, face-api.js, TensorFlow.js, Azure**
 - Built browser-based real-time face authentication for UIDAI/Aadhaar: a CNN maps 68 facial landmarks to 128-D embeddings, matched on-device, with blink and head-movement liveness checks to block photo and video spoofing.
 - Secured the ML model with AES-256 encryption at rest, code obfuscation, and Sub-Resource Integrity to block reverse engineering, the core of the problem statement.
- Voucher Management System | PHP, MySQL, FPDF, PHPMailer, Chart.js**
 - Built a web app digitizing the payment-voucher lifecycle for ~10 PSG institutions: auto-generated A5 PDFs, email-on-creation, and audit tracking, replacing a paper workflow.
 - Designed a role-based dashboard (admin / field staff) with Chart.js analytics for month- and site-wise spend.

PATENT

- SARS: Self-Assisted Reading and Scribing System | Patent (Filed)**
 - Assistive exam device for students with learning disabilities (dyslexia, dysgraphia, dyscalculia), integrating scribble-to-text, voice-to-text, text-to-speech, and write-to-math to replace a human scribe.
 - Indian Patent Application No. 202341032601 | Published 11/04/2025 (Patent Journal 15/2025).

ACHIEVEMENTS & CERTIFICATIONS

Achievements	Certifications
- Finalist, Smart India Hackathon 2024 - Finalist, Meta PyTorch OpenEnv Hackathon 2026 - Finalist, Sandisk Hackathon 2026 - Finalist, Shaastra Techathon – AI/ML Challenge 2024 - Event Coordinator, CSE Association 2025 – Present	- NPTEL: Data Structures and Algorithms using Java Top 5% Rank 2025 - Oracle Cloud Infrastructure 2025 Foundations Associate - Foundation Level Certification in Data Science IIT Madras

EDUCATION

Institution	Programme	Score	Duration
PSG Institute of Technology and Applied Research	B.E. CSE	CGPA: 8.17	2023 – 2027
Velammal Vidhyashram	HSC (CBSE)	94.4%	2020 – 2023

SKILLS

Languages: Python, C++, C, MySQL
Core CS: Data Structures and Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Database Management Systems
